Research shows that work rehabilitation programs are optimized with an early or modified return to work approach to care. This program is designed to enhance clinician skills in making return to work recommendations by translating general ergonomics principles to a specific worker situation and generating viable options to bridge work performance gaps.

### Learning Objectives:

At the end of the training, participants will be able to-

1. Summarize the role of the therapist in the Reasonable Accommodation process.
2. Develop a summary of worker limitations using a physical dimensions approach, based on job information, functional testing and using worker interview.
3. Develop options for work modification using a physical dimensions approach.

	Outline Content Areas
15 Min	Definitions/Background
15 Min	Reasonable Accommodation
30 Min	Understanding Worker Limitations
30 Min	Options for work modification
	Post course quiz and completion of course evaluation

**Equipment:** None specific to training.
